RESUME PROFILE

Highly skilled web developer with 3 years of experience designing and implementing fast and intuitive websites and web applications. Proficient in Back-End technologies with a focus on delivering a seamless user experience and advanced functionality. Experienced in collaborating with cross-functional teams and clients to ensure project success. Possesses a keen eye for detail and a strong commitment to industry best practices.

KEY SKILLS

- **Languages:** PHP, Python, C#, JavaScript, Java, HTML, CSS, Html5
- **Back-End Development:** Laravel Framework, Pure PHP, Python, RESTful APIs
- **Front-End Development:** Bootstrap, JavaScript, React Basics, Tailwind CSS, Vue.js
- **Databases:** MySQL, SQLITE
- **Core Competencies:** Code Review, Bug Fixing, Team Collaboration, Project Launch

EXPERIENCE

Junior Web Developer / Assistant Developer — **marc 2023 – Present**

Client & Academic Projects — Tartous, Syria

- Assisted senior developers in building, testing, and optimizing site features, contributing to the successful launch of three client projects.
- Conducted code reviews to identify and resolve bugs, improving overall code quality and development workflows.
- Developed and integrated backend services using Laravel PHP and MySQL databases.
- Gained hands-on experience and proficiency in modern frameworks (e.g., React, Laravel) through continuous self-study and practical application.
- Collaborated closely with cross-functional teams to deliver projects within defined timelines and budget constraints.

PROJECTS

• **Domain & Hosting Manager:** A centralized control panel designed to manage domains and hosting environments efficiently. Enables users to track expiration dates, link domains to servers, monitor hosting statuses, and receive automated renewal alerts.

Tech Stack: PHP, Laravel 12, Vue 3, Inertia.js, TailwindCSS, REST API, Laravel Scheduler, Queues, Notifications.

Repository: github.com/KhderAhmed/domain-hosting-manager

• **Image Denoising Lab:** A Computer Vision research-oriented project built to simulate image noise, apply various denoising algorithms, and evaluate image quality metrics. Features an interactive interface for experimenting with digital image processing techniques.

Tech Stack: Python, Computer Vision, Image Processing Algorithms.

Repository: github.com/KhderAhmed/image-denoising-lab

- **Hours Project:** A web application focused on optimizing project tracking and workflow management. Built custom backend architecture, efficient routing, and database interactions.

Tech Stack: PHP, Laravel, MySQL.

Repository: github.com/KhderAhmed/hoursproject

- **Tasks & Auth System:** A lightweight web application featuring user authentication and task management capabilities built from scratch using object-oriented PHP and secure database connections.

Tech Stack: Pure PHP, PDO, MySQL, Composer.

Repository: github.com/KhderAhmed/taskproject

EDUCATION

Bachelor's Degree in Information Technology Engineering

Tartous University — Tartous, Syria — **Aug 2026**

PERSONAL DOSSIER

- **Hobbies:** Bees & natural
 - **Date of Birth:** 12th Feb, 2001
 - **Languages:** Arabic, English
-
